(Name and telephone number, including area code, of the person to contact in connection with this report.)

Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

- Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2019.
-

Section 1 - Conflict Minerals Disclosure

Item 1.01. Conflict Minerals Disclosure and Report

SPX FLOW, Inc. (“Company,” “we,” or “our”) has prepared a Conflict Minerals Report, which is filed as Exhibit 1.01 hereto and is also publicly available on our website at www.spxflow.com.

Through our Reasonable Country of Origin Inquiry (RCOI) described in our Conflict Minerals Report (CMR), some suppliers disclosed to us that scrap/recycled sources of tin, tantalum, tungsten or gold were identified in their supply chains and did not require due diligence. This determination is included in the conflict minerals information posted on our website.

Item 1.02. Exhibit

The Company’s Conflict Minerals Report is filed as Exhibit 1.01 hereto.

Section 2 - Exhibits

Item 2.01. Exhibits

The following exhibit is filed as part of this report.

<u>Exhibit Number</u>	<u>Description</u>
1.01	SPX FLOW, Inc. Conflict Minerals Report for the period from January 1 to December 31, 2019

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

SPX FLOW, INC.

Date: May 22, 2020

By: /s/ Jaime M. Easley

Jaime M. Easley

Vice President, Chief Financial Officer and Chief Accounting Officer

Conflict Minerals Report

I. Introduction

Based in Charlotte, North Carolina, SPX FLOW innovates with customers to help feed and enhance the world by designing, delivering and servicing high value process solutions at the heart of growing and sustaining our diverse communities. The product offering of the Company's continuing operations is concentrated in process technologies that perform mixing, blending, fluid handling, separation, thermal heat transfer and other activities that are integral to processes performed across a wide variety of sanitary and industrial markets. SPX FLOW had approximately \$1.5 billion in annual revenues with continuing operations in more than 30 countries and sales in more than 140 countries.

Certain of our products contain materials or components that use tin, tantalum, tungsten and/or gold ("3TG"). Due to the depth of our supply chain, we are often far removed from the sources of ore from which these metals are produced and the smelters/refiners that process those ores; the efforts undertaken to identify the countries of origin of those ores reflect our circumstances and position in the supply chain. The amount of information available globally on the traceability and sourcing of these ores is extremely limited at this time; this situation is not unique to us. We have taken steps to identify the applicable smelters and refiners of such 3TG metals in our supply chain; however, we believe that the smelters and refiners of 3TG are best situated to identify the sources and countries of origin of the 3TG. We rely on our suppliers to provide us with information on the origin of any conflict minerals contained in components and materials supplied to us.

The due diligence efforts noted below were undertaken on the products manufactured by us in 2019.

II. Reasonable Country of Origin Inquiry (RCOI)

We instructed our direct suppliers to provide answers to the Electronic Industry Citizenship Coalition-Global e-Sustainability Initiative (EICC-GeSI) Conflict Minerals Common Reporting Template. The EICC-GeSI Conflict Minerals Common Reporting Template is regarded as the most common tool for reporting conflict minerals content and sourcing information worldwide, developed by several of the world's leading consumer electronics companies.

In some cases, suppliers were required to provide corrections and clarifications.

As such, we believe our RCOI process was reasonably designed and performed in good faith.

III. Design of Due Diligence Framework

We designed our due diligence framework to conform in all material respects with the OECD 2013 Guidelines - *OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas: Second Edition*, OECD Publishing, <http://dx.doi.org/10.1787/9789264185050-en>

IV. Due Diligence Measures Performed

Due diligence measures we performed include, but are not limited to, the following:

- Reporting to senior management and the Board of Directors regarding the structure of our conflict minerals program.
- Reporting to senior management on direct suppliers' responses to our conflict minerals information requests.
- Communicating our policy on conflict minerals to direct suppliers.
- Communicating the commitments and requirements expected of our direct suppliers, supported by, when appropriate, email and phone dialogues.
- Comparing smelters and refiners identified by suppliers to the Conflict Free Sourcing Initiative ("CFSI") lists of validated conflict free and verified facilities and the US Department of Commerce "Reporting Requirements Under Section 1502(d)(3)(C) of the Dodd-Frank Act World-Wide Conflict Mineral Processing Facilities" (<http://www.ita.doc.gov/td/forestprod/DOC-ConflictMineralReport.pdf>), and our own independent research.
- Developing a risk mitigation plan that allows for continued trade with a supplier as appropriate through the supplier's risk mitigation efforts, and evaluating the business relationship with suppliers that do not address the risks.
- Developing contractual terms and conditions regarding procurement practices that encourage suppliers to purchase raw materials from smelters/refiners which have achieved a conflict free designation by the CFSI's Conflict Free Smelter Program ("CFSP") or have an audit program with which CFSI has mutual recognition.

V. Product Determination

We received inconclusive data from our direct suppliers. Material source information is still developing. To date, we have received no information from our direct suppliers indicating that the tin, tantalum, tungsten or gold we purchased from them directly or indirectly financed or benefited armed groups in the Democratic Republic of the Congo (“DRC”) or adjoining countries. Some suppliers disclosed to us that scrap/recycled sources of 3TG were identified in their supply chains and did not require due diligence.

We believe the following smelters/refiners have achieved a conflict free designation by the CFSI’s CFSP or have an audit program with which CFSI has mutual recognition, or are actively in the process of obtaining the designations, or are smelters/refiners for which we independently obtained country of origin information:

Countries of origin for 3TG from the above smelters/refiners are believed to be:

Andorra, Argentina, Australia, Austria, Belgium, Bolivia (Plurinational State of), Brazil, Canada, Chile, China, Czechia, Estonia, Ethiopia, France, Germany, Hong Kong, India, Indonesia, Israel, Italy, Japan, Kazakhstan, Korea (Republic of), Kyrgyzstan, Lithuania, Macedonia (The Former Yugoslav Republic of), Malaysia, Mexico, Myanmar, Netherlands, New Zealand, North Macedonia (Republic of), Peru, Philippines, Poland, Russian Federation, Rwanda, Saudi Arabia, Singapore, South Africa, Spain, Sudan, Sweden, Switzerland, Taiwan (Province of China), Thailand, Turkey, Uganda, United Arab Emirates, United Kingdom of Great Britain and Northern Ireland, United States of America, Uzbekistan, Viet Nam, Zambia and Zimbabwe.

The following facilities were validated as smelters/refiners or have been audited by the CFSI, but country of origin information was not available. We continue to engage with our suppliers to determine the source of 3TG processed at the following facilities and to engage in efforts to determine the mine or location of origin of the 3TG used with greater specificity.

(None to report. All Smelters were reported with Countries)

* Facility has obtained a conflict free audit for a metal different from those indicated in this list.

** Facility has obtained a conflict free audit but country of origin information was not available to SPX FLOW, Inc.

VI. Product Description

Our products subject to this disclosure are pumps; valves; mixers; plate heat exchangers; dehydration technologies; filtration technologies; rotating and stationary heat exchangers; and industrial tools and hydraulic units. The 3TG necessary to the functionality or production of these products are, to our knowledge, obtained from suppliers who source these metals from the smelters/refiners and countries identified to date and listed in Section V above.

VII. Independent Private Sector Audit

Not required for calendar year 2019.
